THE ALBERTA LEGISLATURE

No Budget Amended—Debate Col-lapse— Disposition of High-way Grant—Railway wanted West of C. & E.

BY JOHN MACKENZIE

During the past week the Alberta House has been working at high pressure with a view to cleaning up the business on hand by Easter. here is a possibility that another short session will be held after Easter, if the Dominion makes any change in the agreement re Natural Resources, and has its rural credit bill in shape.

Budget Agreed To

It had been expected that the budget debate, which opened Monday with the address of the leader of the opposition, J. C. Bowen, would continue till Wednesday evening, but it died on Monday evening, after one other Liberal, W. T. Henry, had spoken and four Farmer members had replied to Mr. Bowen's criticisms.

Other Liberals had been expected to speak, and Premier Brownlee was to have wound up the debate, but the Liberals showed no inclination to go on, and the Premier was out of the House that evening. This is considerable precedent, and no dissent when the budget motion was put. This is considered extraordinary, particularly in a pre-election session.

In his address on the Budget the Liberal leader doubted the accuracy of the surplus announced last year, claiming that had it not been for the highway grant of the Dominion Government being placed in income instead of capital, and the unusually high amount received in 1925 in succession duties there would have been a surplus. The Government had added \$27,000,000 to the bonded debt in the past five years, and had no fiscal policy. He suggested a vigorous land settlement policy, and a bigger effort to find coal markets.

Answering the opposition leader, Hon. Geo. Hoadley said he had never listened to such a melancholy and pessimistic address, the publication of which would do harm to Alberta. The statements made were unfair and inaccurate. The Canadian highway grant was properly put into income, as the amount \$274,000, had been spent out of income in 1924, and the sum received from Ottawa was a repayment. The net addition to the debt during the Government's term of office was less than \$19,000,000, and over \$16,000,000 of this was rendered necessary by commitments of the previous administration.

Urges Inspection of Immigrants

Referring to immigration, Mr.

Big Game Hunter gets Live Wolves

1. Rover and Patsy and on right, Captain Doudera, hero of the chase, with his shot trophy over his shoulder. 2. Rover and Patsy photographed on arrival at the C.P.R. Windsor Station, Montreal.

Fulfilling his promise to James Walker, Mayor of New York, Captain Frank Doudera, well known Brooklyn big game hunter and sportsman, arrived at the Canadian Pacific Windsor Station in Montreal recently from Northern Ontario with two live wolves which he captured on Lake Temiskaming, at the junction where the River Kippawa flows into the lake. The two animals, named Patsy and Rover, are intended for the Brooklyn Zoo.

When taken out of their cages in the baggage rooms at the Windsor Station, both Patsy and Rover displayed decidedly nervous tendencies. Patsy is an ash blonde, endowed by nature with a pearly grey coat of fur, tinged with red, which glistens a little in the sun. Rover seemed to be a bit worn in spots, but his fur, whatever there is of it, is a bluish black, closely resembling a blue fox. Rover was inclined to rove. When taken into the express yards he buried his head in the snow. After a snow-

eating performance he insisted on climbing over the fence via mounds of snow, but a strong hand at the leash detained him.

Patsy turned out to be a mild, good-natured child who accepted the overtures of her audience with becoming meekness. A pat on the head from a total stranger solicited a kind look from the young lady's large grey eyes which peep forth like pretty buttons on old-fashioned shoes.

Rover was not so meek. At the same pat on the head from the same total stranger he snarled bitterly and would have avenged the indignity with blood but for the muzzle.

The wolves are only about ten months old. Rover weighs one hundred pounds and measures about five feet from the tip of his snow-washed nose to the end of his scraggy tail. Patsy weighs about eighty-five pounds and is several inches shorter than Rover. In addition to the two live wolves, the captain has seven dead ones.

Doudera claims a record in shooting the last wolf after a chase which lasted only three hours and forty minutes. Usually it takes several days to corner a wolf. The animal takes long, powerful strides and covers ground at an amazing pace. But in the present case there had been a heavy fall of snow and the wolf had floundered along until Doudera came within fifteen feet. The animal then turned, bared his fangs, let loose a series of howls and leaped at his pursuer. The captain pulled the trigger of his gun and a bullet pierced the wolf's heart and shoulder.

During the expedition the hunter was aided by Fred Arnott, who operates the Tem-Kip chain of camps. Captain Doudera brings with him six thousand feet of films showing authentic pictures of wolves in their native haunts. The sportsman reported that game was very plentiful in the Lake Temiskaming district. Deer are to be found within a few hundred yards from camp.

NEWS FROM SURROUNDING DISTRICTS

NEWS FROM NEILBURG

A meeting of the Neilburg Progressive Association was held in the Neilburg Hall on Friday evening.

The aims of the party were outlined by Mr. W. H. Lillwall, and Mr. Max Campbell.

Mr. I. E. Pool returned on Tuesday's train, and intends breaking 120 acres of his farm north of town.

(Continued from page 6)

PROSPECT VALLEY NEWS

The young men of Prospect Valley and Bloomington gave a Min-strel at the Prospect Valley school house last week which was very much enjoyed, as well as the dance which followed.

They have been asked to put it on at Bloomington which they will do on Tuesday, the 30th. Everybody come and have a good time.

(Continued on page 6)

EDGERTON NEWS

A meeting of the Board of Trade was held on Friday night March 26th. The business included the election of officers.

Mr. E. Ripley was elected President.

Boyd Secretary-Treasurer. A letter was received from J. R. Love, M.L.A. intimating that a bridge across the river north of Edgerton would be proceeded with early this year.

EXPERIMENTAL FARM NOTES

THE WATER REQUIREMENTS OF CROPS

The intimate relationship between moisture supply and crop yields is emphasized in some experiments now being carried on at the Dominion Experimental Farm at Swift Current, Saskatchewan. In these experiments it is possible to measure the amount of moisture used in producing common farm crops.

Farmers in the Prairie Provinces would probably be surprised to learn of the enormous amounts of water used in producing a wheat crop. During 1924 and 1925 it required over 40 tons of water to produce one bushel of grain on summer-fallowed land and 60 tons on plowed wheat stubble land. For each inch of water used, 2.8 bushels to the acre was produced the fallowed land and 1.85 bushels on the plowed wheat stubble land. This water was secured from two sources, that stored in the soil at time of seeding and from rainfall during the growing season. For each inch of water used, 2.8 bushels per acre were produced on the fallowed land and 1.85 bushels on the plowed wheat stubble.

As a rule wet or dry seasons, which mean an increase or decrease in the moisture supply, result in high or low yields. Last year a yield of 15 bushels of wheat per acre was produced with 7.8 inches of water, of which 3.65 inches represents the rainfall between seeding and harvest. At the same time a small plot of wheat to which rainwater was added as required during the season, yielded at the rate of 65 bushels per acre; it required over 24 inches of water, however, to produce this result. Oats and barley behave very similar to wheat in the use of water.

Some crops are more efficient than others in the use of water, that is to say some crops will use less water than others in producing equal yields. Corn and potatoes are more efficient than sunflowers or grain, grasses and clovers are less efficient.

THE HOTBED AND THE HOME GARDEN

By the use of hotbeds early in the spring the maturity of certain crops can be hastened, a greater variety of vegetables can be grown in the home or farm garden, a more extensive floral display is possible, and the risk of loss of seedling plants is greatly lessened, since they can be easily cared for and protected.

Just as plants from tropical and temperate regions require particular and definite conditions of environment for best growth, so do we find within these groups di-

CHAPTER IX

The Brute

Between the two stalwart men who fronted one another stripped to trousers and shoes, there was not so much to choose. Woodhull perhaps had the better of it by a few pounds in weight, and forsooth less slouchy out of his clothes than in them. His was the long and sisewy type of muscle. He was in hard condition.

Banion, two years younger than his rival, himself was round and slender, thin of flank, a trace squarer and fuller of shoulder. His arms showed easily rippling bands of muscles, his body was hard in the natural vigor of youth and life in the open air. His eye was fixed all the time on his man. He did not speak or turn aside, but walked on in.

There were no preliminaries, there was no delay. In a flash the Saxon ordeal of combat was joined. The two fighters met in a rush.

At the centre of the fighting space they hung, body to body, in a whirling melee. Neither had much skill in real boxing, and such fashion of fight was unknown in that region, the offensive being the main thing and defense remaining incidental. The thud of fist on face, the discolouration that rose under the savage blows, the blood that oozed and scattered, proved that the fighting

blood of both these mad creatures was up, so that they felt no pain even as they knew no fear.

In their first fly, as witnesses would have termed it, there was no advantage to either, and both came out well marked. In the combat of the time and place there were no rules, no periods, no resting times. Once they were dispatched to it, the fight was the affair of he fighters, with no more than a very limited number of restrictions as to fouls.

They met and broke, bloody, gasping, once, twice, a dozen times, Banion was fighting, slowly, carefully.

"I'll make it free, if you dare!" panted Woodhull at length.

They broke apart once more by mutual need of breath. He meant he would bar nothing he would go back to the days of Boone and Kenton and Girty, when hair, eye, any part of the body was fair aim.

"You can't dare me!" rejoined Will Banion, "It's as much as my life says."

Young Jed Wingate, suddenly pale, stood by and raised no protest. Kelsey's face was stoney calm. The small eye of Hail narrowed, but he too held to the etiquette of non-interference in this matter of man and man, though what had passed here was a deadly thing. Mutilation, death might now ensue, and not mere defeat. But they all waited for the other

side. "Air ye game to hit, Will?" demanded Jackson at length. "I don't fear him, anyway he comes," replied Will Banion. It was forced on me."

"The hell it was!" exclaimed Kelsey. "I heard ye call my man a liar."

"An' he called my man a coward!" cut in Jackson.

"He is a coward," sneered Woodhull, panting, "or he'd not flicker now. He's afraid I'll take his eye out, damn him!"

Will Banion turned to his friends.

"Are we gentlemen at all?" said he. "Shall we go back a hundred years?"

"If your man's afraid, we claim the fight!" exclaimed Kelsey. "Breast yore bird!"

"So be it then!" said Will Banion. "Don't mind me, Jackson! I don't fear him and I think I can beat him. It's free I bar nothing, nor can he! Get back!"

Woodhull rushed first in the next assault, confident of his skill in rough-and-tumble. He felt at his stoat the horizontal arm of his enemy. He caught away the wrist in his own hand, but sustained a heavy blow at the side of his head. He forgot everything but contact, rushed, closed and caught his antagonist in the brawny grip of his arms. The battle at once resolved itself into the wrestling and battering match of the frontier. And it was free! Each might kill or maim if so he could. The wrestling grips of the

frontiersmen were few and primitive, efficient when applied by masters; and no schoolboy but studied all the holds as matter of religion, in a time when physical prowess was the most admirable quality a man might have.

Each fighter tried the forward jerk and trip which sometimes would do with an opponent not skilled; but this primer work got results for neither. Banion evaded and swung into a hip lock, so swift that Woodhull left the ground. But his instinct gave him hold with one hand at his enemy's collar. He spread wide his feet and cast his weight aside, so that he came standing, after all. He well knew that a man must keep his feet. Woe to him who fell when it was all free! His own riposte was a snakelike glide close into his antagonist's arms, a swift thrust of his leg between the other's—the grapevine, which sometimes served if done swiftly.

It was done swiftly, but it did not serve. The other spread his legs, leaned against him, and in a flash came back in the dreaded crotch lock of the frontier, which some men boasted no one could escape at their hands. Woodhull was flung fair, but he broke wide and rose and rushed back and joined again, grappling; so that they stood once more body to body, panting, red, savage as any animals that fight, and more cruel. The seconds all were on their feet scarce breathing.

They pushed in sheer test, and each found the other's stark strength. Yet Banion's breath still came even, his eye betokened no anxiety of the issue. Both were bloody now, clothing and all. Then in a flash the scales turned against the challenger.

Banion caught his antagonist by the wrist, and swift as a flash stooped, turning his own back and drawing the arm of his enemy over his own shoulder, slightly turned, so that the elbow joint was in peril and so that the pain must be intense. It was one of the jiu jitsu holds, discovered independently perhaps at that instant; certainly a new hold for the wrestling school of the frontier.

Woodhull's seconds saw the look of pain come on his face, saw him wince, saw him writhe, saw him rise on his toes. Then with a sudden squatting heave, Banion cast him full length in front of him, upon his back! Before he had time to move he was upon him, pinning him down. A growl came from six observers.

In an ordinary fall a man might have turned, might have escaped. But Woodhull had planned his own undoing when he called it free. Eveless men, usually old men, in this day brought up talk of the ancient and horrible warfare of a past generation, when destruction of the adversary was the one purpose and any means called fair when it was free.

But the seconds of both men raised no hand when they saw the balls of Will Banion's thumbs pressed against the upper orbit edge of his enemy's eyes.

"Do you say enough?" panted the victor.

A groan from the helpless man beneath.

"Am I the best man? Can I whip you?" demanded the voice above him, in the formula prescribed.

"Go on—do it! Pull out his eye!" commanded Bill Jackson.

Rah! Rah! Collegians Planning to Invade Europe To Call Upon England, Holland Belgium and France

LAON, FRANCE,
NEAR THE SITE
OF THE BIG
BERTHA

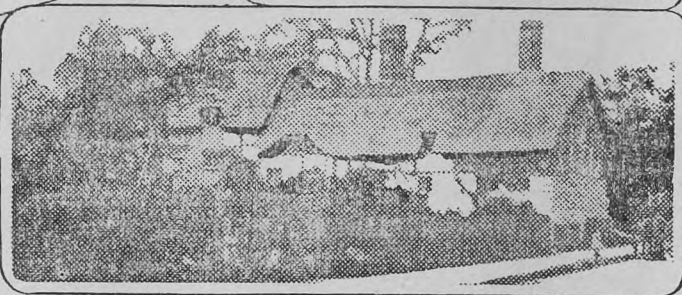

MELITA, A
MONOCLASS
CABIN SHIP

SHAKESPEARE'S
HOUSE,
STRAFORD-ON-AVON

NOTRE
DAME, PARIS

ANN HATHAWAY'S COTTAGE

England, Holland, Belgium and France are the popular countries for collegiate tours during the summer of 1926, and the St. Lawrence route seems to be the popular short route for many students. The idea of being able to cross the ocean and get back home again at the price usually paid for one way, seems to be the necessary inducement to college people, and bookings are much ahead of last year.

No one should attempt to see Europe without a background of England. The experienced travelers arranging the collegiate tours realize this, and plan a week visiting Oxford, the great intellectual centre, Stoke Poges and other bits of rural England, and London. London, so full of interest historically and with many nooks and crannies filled with the ghosts of famous literary personages!

France comes next to England in popularity with college folks. Some there are who become so thrilled with life in Paris that a second trip across the ocean would be incomplete

without at least a week in the gay boulevards and art galleries of France's capital. But there are others to whom the somewhat superficial atmosphere of the chic Paris is less attractive than the wooden shoes and quaint caps and flaxen braids of the Hollandaise.

Very few in Canada have not some keen personal interest in the battle areas of France and Belgium, and so most of the collegiate tours embrace an extensive motor trip through Belleau Wood, Chateau Thierry, Soissons, Senlis, and Rheims.

The idea of the collegiate tours is rapidly becoming an accepted thing.

At first, to travel third class did not appeal even to the enthusiastic graduate unable to do travel without a substantial reduction in even the second class fares. But, realizing the increasing number of professional people willing to travel at reduced rates, the steamship companies inaugurated, the tourist third rate, put rugs on bare stateroom floors, revised the menus to suit Canadian tastes instead of foreign, and the result was that students and professors last year hobnobbed with each other below decks. This year ever increasing numbers will follow the example set by the venturesome ones of last year.

THE HOTBED AND THE HOME GARDEN

(Continued from Front Page)
 versity in requirements for proper development. For the purpose of this article, the classification adopted is simply a separation into those crops which can

be sown where they are to mature in the open, and those whose maturity can be hastened, and yield increased by first sowing the seed in a hotbed and later transplanting to the garden where good growing conditions exist and all danger of frost is over. Some of the garden crops which belong to

the latter class are: tomato, pepper, egg plant, celery, cabbage, cauliflower, vine crops and half-hardy flowers. For many of these crops, soil temperature is as important as air temperature, hence they must be started where artificial heat is provided.

The hotbed should be prepared six weeks before the date on which the last spring frost is experienced in your district on the average. Use fresh friable soil. Seeds may be sown directly into the soil in the hotbed or into flats which are placed in the hotbed—the advantages of the latter system far outweigh its disadvantages.

Always water on a rising temperature, that is, before noon in spring. Infrequent heavy waterings that penetrate to the roots are better than daily light sprinklings that merely wet the surface. By careful watering and ventilating strong plants will be obtained.

Hubam, an annual sweet clover is more efficient than the biennial sweet clover. Weeds vary considerably depending on the variety. Russian thistle requires but little water while stink-weed uses comparatively large amounts. The experiments have shown that the water used by weeds may cause a serious reduction in the yield of wheat.

RATES OF SEEDING

Experimental Farm Notes
 (Scott, Sask.)

The experiments in rates of seeding grain on summerfallow at the Scott Experimental Station have given varying results depending to a large extent on seasonal conditions.

In each case five different quantities of seed were used. Wheat was seeded from three quarters of a bushel to two bushels per acre and oats and barley from one to

three bushels per acre.

The average yield of wheat for five years resulting from seeding three quarters of a bushel per acre was 24.6 bushels—from one bushel, 24.0 bushels—from one one quarter bushels, 24.6 bushels—from one and one half bushels, 25.0 bushels—from one and three quarters bushels, 24.1 bushels and from two bushels, 25.1 bushels per acre.

The average yield of oats for eight years resulting from the one bushel per acre seeding was 57.3 bushels—from one and one half bushel seeding, 60.2 bushels—from two bushels, 62.9 bushels—and from three bushels, 62.8 bushels per acre.

The average yield of barley for a seven-year period resulting from one bushel per acre seeding was 22.3 bushels per acre, from one and one half bushel seeding, 22.9—from two and one half bushels, 21.5 bushels and from three bushels 21.2 bushels per acre.

ALBERTA LEGISLATURE

(Continued from page one)

Hoadley argued for a proper medical inspection in Europe. The people now conducting the examination were steamship and transportation officials, whose idea of qualifications for immigrants seemed to be the ability to pay the fare and walk aboard the ship. More than half the people of Alberta asylums and hospitals were foreign born, but it was next to impossible to deport them, because they were destitute.

Other speakers in the debate were: W. T. Henry (Liberal Edmonton), Russell Love (U.F.A., Wainwright), W. H. Shields (U.F.A., Macleod) and Donald Cameron (U. F. A., Innisfail).

Liberals Want Money Spent on Main Highways

A full-dress debate was staged on Wednesday on the Canada Highways Act. R. C. Marshall, (Liberal Calgary), and J. C. Bowen, opposition leader, supporting a resolution that the Government should use all moneys earned under the Dominion Highways Act for the construction of highways in the Province. They contended that the money should not be placed in general revenue, but specially devoted to main highways, which in the opinion of the Liberal speakers, did not include market roads. The money received was being used for political purposes, and to balance the budget.

Premier Brownlee replying said that the argument was absurd. Every dollar received from the Canada Highway Act was spent on highways, and would continue to be spent on highways.

Hon. Alex. Ross, Minister of Public Works, said that as against \$274,000 of a grant, earned in 1924, and received in 1925, the province had expended \$1,300,000 in 1924 and a similar amount in 1925, on highways, bridges, and interest on highways projects. The Dominion would not give the grant unless it was expended on highways. Market roads, to get grain, etc., to markets, were highways, and as much entitled grants as the trunk tourist roads.

Moving as an amendment the addition of the words "continue to" making the resolution read that the Government should continue to spend the money received from Canada Highways Act on

highways the vote resulted in, Bowen, Dechene, Marshall and Pingle, Liberals, voting against the amendment, while the motion as amended carried without audible dissent.

Estimates and Legislation

During the week consideration of the estimates was taken up, the votes for the Departments of Agriculture, Health, Provincial Secretary, and Public Works being passed.

A number of bills were passed through the committee stage.

Railway West of C. & E.

Nelson Smith, (U.F.A., Olds) and Donald Cameron (U.F.A., Innisfail) moved and seconded on Thursday, a resolution asking the Canadian National Railway to construct a line from the Calgary, to serve the district west of the Calgary and Edmonton railway which had been promised railway facilities in 1910. There was a fine farming district east of the foothills, but many settlers were moving out as they had to haul their produce long distances to the railway at present.

Alex. Moore, (U.F.A., Cochrane), Joe Dechene (Liberal, Beaver River), Salmi Brown (U.F.A., High River), R. C. Marshall (Liberal, Calgary), Geo. Hoadley (U.F.A., Okotoks), Mrs. McClung (Liberal Edmonton), G. W. Smith (U.F.A., Red Deer) and L. A. Giroux (Liberal, Grouard) supported the resolution.

J. C. Bowen, Liberal leader, opposed, on the ground that the sending of resolutions to Ottawa should be discouraged, and that the resolution was political in nature. Premier Brownlee replied that it was within the right of the people of Alberta to send resolutions to Ottawa on anything that concerned the welfare of the people of Alberta, when the matter was under the jurisdiction of the Dominion. If we had been as persistent in the past as other provinces in making our requests we would be better off today.

The resolution was carried, Mr. Bowen being the only dissident.

Bishops of London England have lived at Fulham for 1,300 years.

ITEMS OF INTEREST

Born: To Mr. and Mrs. George Goede, Sunday March 28th a son.

Mrs. D'Albertanson, Sr. spent a few days this week at Unity as the guest of Mr. and Mrs. J. MacDonald.

We were all pleased to welcome Mr. Cyril Smith on Saturday,

from California with his bride. Mr. Smith is the second one of our local boys to bring home a bride this month, and with all his many friends we wish Mr. and Mrs. Smith the best of happiness and prosperity.

Mr. W. O. Harris has opened an implement store in the premises formerly occupied by J. A. MacKenzie.

Several of the quarantine cases have been released during the past week.

A dance will be held in Bull Creek school. Thursday, April 8, Admission 50c.

The Annual Meeting of the Prosperity Station in the Chauvin Mission Field will be held immediately after service on Sunday April 4th.

Clifford Harris returned home Monday after having spent 13 weeks in hospital in Edmonton where he had been receiving treatment for his hand, having accidentally had his thumb caught in an engine whilst attending to the oiling

A meeting of the local Wheat Pool Association will be held on Tuesday, April 6th at 2 p.m. at Chauvin.

Mrs. McCrea and Miss Bell Burton of Ribstone visited Chauvin Wednesday.

Mr. and Mrs. Wilson and daughter of Saskatoon arrived in Chauvin Tuesday,

Some people talk as though length make up for lack of depth.

A FARMER'S ACCOUNT BOOK

Farmers who are interested in keeping a record of their business and who wish to know if the various branches of their work are bringing them a reasonable return, will do well to obtain a copy of a simple farmer's account book published by the Department of Agriculture, at Ottawa and supplied at ten cents a copy. The book, which is designed to last a complete year, calls for no special knowledge of accounting and will take up very little time for recording the items. It contains pages for the entry of receipts and expenditures relative to different farm activities. There is a page for amounts owed to and by the farm, and forms on which may be made inventories of lands and buildings, live stock, feed and supplies and machinery, also a page on which may be entered a summary of the year's business. There are simple directions for

using the book. It is a useful publication and may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

HAIL BOARD HAS GOOD YEAR

The municipal hail insurance board of the province announces a reserve of over \$700,000, with the statement that its financial condition is better than for some time. The total risk carried last year was \$10,886,000, and the awards of the season amounted to \$685,000.

Protect yourself by trading at Saker's.

REFINERY TO START OIL SHIPMENT

The Alberta Refineries at Edmonton will start shipment of its product this coming week, the first carload of refined oil going out to Bashaw. The refinery will also supply oil to the Canadian National Railways.

WANT ALBERTA MAN

The Provincial Legislature this week unanimously passed a resolution asking the Federal Government to appoint a representative of Alberta's interests on the Vancouver harbor board.

MRS. ANNIE LACY,
A PIONEER OF BATTLE
VALLEY PASSES AWAY

The death of Mrs. Annie Lacy, one of the pioneers of Battle Valley, occurred at the University Hospital at Edmonton, Tuesday March 23rd, following an operation.

She had been ill for a year and it was hoped that an operation would restore her to her former health.

She leaves to mourn her loss, two sons, Mr. Hugh Lacey and Mr. Neil Lacey, who were with her at her death, and one daughter, Mrs. Harold Warrington.

The many friends of the family extend their sympathy.

HEAVY RAINS IN ALBERTA

During the past week heavy rains fell in several districts in the province.

Rastus Jackson, a thoroughly married ducky was one day approached by a life insurance agent.

"No Sah, declared Rastus, emphatically. "Ah, ain't no too safe at home as it is."

It was the end of the scene and the heroine was starving.

"Bread!" she cried, "Give me bread!"

Then the curtain came down with a roll.

Wild horses which roam the sagebrush plateau of British Columbia are said to be the descendants of horses left behind when mining towns were deserted.

THE HOG AS A SOURCE
OF FARM REVENUE

"Well managed the hog is one of the best sources of farm income. Hogs have paid for many a farm. We can sell hogs at any time of the year and at almost any age and weight."

This is one of the introductory statements in a remarkably interesting and useful booklet entitled "Hogs for Pork and Profit," just issued by the Bank of Montreal, and offered free to farmers at any branch of that institution.

For some time past the Department of Agriculture at Ottawa has been doing commendable work all over Canada encouraging the production of hogs as a supplementary source of income for farmers, and the booklet will admirably assist this movement by making available to those interested plain and detailed descriptions, illustrated by over 200 photographs and diagrams, of the guiding principles of successful and profitable hog raising. While the booklet is of a general character, covering methods under a wide variety of climatic conditions, particular attention both as regards text and illustrations, has been paid to conditions pertaining to hog raising in Canada and a special introduction has been contributed by Mr. C. B. Rothwell, B. S. A., Dominion Animal Husbandman at the Central Experimental Farm, Ottawa. Mr. Rothwell gives an outline of the principle breeds and types and the accepted methods of feeding in Canada, and offers general advice in regard to the principles described in the booklet.

Every phase of hog raising is pictured in the booklet, both by word and by photograph, the subjects dealing with the selection of sires and mothers, the choice of breeds and types, and the care of the young pigs from the time they are born until they are ready for the market. Feeding, housing, the prevention of ailments and diseases, and the production of particular types for special markets, are all described; in fact there is no phase of the industry on which the best scientific knowledge is not made available in plain, everyday language. As the booklet says, the hog will produce more meat from 100 pounds of feed than any animal; it multiplies rapidly; and it will not only provide food for the farmer's family, but is one of the best sources of farm income.

A free copy of the booklet may be obtained at the nearest local branch of the Bank.

Seed growing which began to engage the attention of the farmers in the Burns Lake district, Central British Columbia, last year have been so successful that the provincial department of agriculture has established a seed cleaning plant at Burns Lake. Timothy seed was practically grown last year, but operations will be extended to other forage plant seeds and grains this year.

THE VALUE OF
CROP ROTATIONS
IN MAINTAINING
SOIL FERTILITY

The maintenance of soil fertility is assured for the irrigated districts of Southern Alberta in so far as nitrogen and humus are concerned provided that alfalfa has a prominent place in the rotation, states Dr. Frank T. Shutt Dominion Chemist, in a new bulletin of the Department of Agriculture, which deals with the influence of continuous grain growing on soil fertility, gives the details of a series of experiments with ten-year crop rotations conducted on irrigated land at Lethbridge. Ten plots were used and each rotation comprised six successive crops of alfalfa, one hoed crop and three grain crops. Large yields of alfalfa hay and cereals were harvested during the eleven years of the experiment, yet, there was a marked increase in the nitrogen content of the soil of every plot. In one plot even though 2,628 pounds of nitrogen were removed by the crops, the residual gain at the close of the period to a depth of twelve inches was 2,235 pounds. In spite of amounts removed by the crops, the gain in nitrogen per acre every year ranged roughly from 70 to 200 pounds on nine of the ten plots.

In the series these results accord in a large measure with those obtained in a series of experiments conducted at the Central Experimental Farm, Ottawa, from 1902-1912.

Compare Saker's Prices with any mail order prices. It certainly pays to buy at home, especially when you consider that you see and inspect the goods before you buy.

What is firmness of purpose with some people is merely obstinacy if it happens to be the other fellow."

WHEAT POOL CONVENTION

A Wheat Pool Convention will be called in Edgerton on Saturday April 10th at 1.30 p.m. All Pool signers in this district are earnestly requested to attend. Mr. Jackman will be present and efforts are being made to get H. W. Wood.

CHAUVIN TENNIS CLUB

The Chauvin Tennis Club called a meeting for Tuesday evening of present members and all who were interested in tennis for the coming season. A good number attended and the following officers were elected:

W. F. Sutherland elected Honorary President
Mr. Hawthorn, President
C. G. Dewar Vice-President.
Phyllis McLeod Sec'y-Treas
Executive: Miss McCluskey, Mr. Mathot, Mr. Mathieu
Social Committee: Mrs. Freeman, Mrs. Pelletier, Mrs. Parcels Mrs. McNutt.

Fees: \$3.00 per member. \$5.00 family ticket (including all members over 15 years)

Mrs. Cameron: "There's Critchton's cow broken into our yard again. What shall I do?"

Mr. Cameron: "Well don't stand there doing nothing. Milk her and put her out."

"Nobody can hear my husband and I quarrel, for we don't begin until my neighbours gramophone starts in the evening."—Witness at Marylebone Court.

According to a German scientist a soap bubble is only 1-150 millionth of an inch thick. Thin gold foil is about 1-250,000ths of an inch thick.

It's no good suffering in silence if you're going to talk a lot about it afterwards.

The thinnest and toughest leather is made from frog's skin.

Society Girl to Make Movies

Miss Mary E. Cooke, a charming addition to the group of passengers making the trip to the West Indies this winter on the Canadian Pacific liner Montroyal, brought along a movie camera with which to photograph interesting sights on the cruise. Miss Cooke is shown here utilizing her camera for the first time, taking movies of her friends, as the S.S. Montroyal pulled out of New York harbour on March 1 for a 29-day cruise of Caribbean waters.

To Search for the Missing Link

Roy Chapman Andrews, famous anthropologist and head of the Third Asiatic Expedition under the American Museum of Natural History, photographed on the Canadian Pacific Liner Empress of Russia, when he sailed recently for the Far East en route to the Gobi Desert. With Mr. Andrews was M. B. Shackelford, motion picture expert, who will accompany the expedition.

So far previous journeys of the Third Asiatic Expedition into the heart of Central Asia have brought to light the existence of the remains of dinosaurs and other pre-historic monsters and if its members can find the bones of pre-historic man they will have established definite proof that Central Asia is the mother of life in America and Europe.

Mr. Andrews' (shown above at left) chief mission is therefore to "discover 'the missing link,' a quest in which the best scientific minds of the world have been engaged for centuries.

NEWS FROM NEILBURG

(Continued from page one)

Between 50 and 60 children are attending the Neilburg school, and considerably more intend starting at Easter.

Mr. Chas Officer left Saturday to attend the Regina Winter Fair.

A meeting was held on Friday evening in the Galvin Lumber Office by the staff of the Neilburg Baseball Club.

The following officers were elected:

President D. W. Taylor
Manager L. E. Gibbons
Sec.-Treas Harold Scott.

A very enjoyable time was spent on St. Patrick's evening when nearly 150 people danced to the music of the Mitchells Orchestra. On account of the road conditions, several were unable to attend. A dainty suppers was served

by the staff of the Neilburg Hotel.

PROSPECT VALLEY NEWS

(Continued from front page)

Prospect Valley has been taking its share of measles and the necessary quarantine.

The U.F.W.A. of Prospect Valley and Battle Valley will hold its April meeting at the home of Mrs. Heffren on Thursday afternoon, April 1st. Come prepared to stay for the evening when there will be a whist drive.

Now is the time to buy your shoes. Saker's have a fine range of new stock just unpacked, and at prices that will suit the most keen buyers.

W. H. I. writes: "A batch of jokes I sent to the editors were rejected as no good, but when I threw them in the stove the fire just roared."

HOW THE SPIDER ASSISTS THE SURVEYOR

meekly.

The lowly spider, as he spins his web to entrap the unwary fly is exercising a faculty that has been made use of for years in the construction of certain kinds of scientific instruments. Included in this category, is the surveyor's transit-theodolite.

If you look through the telescope of such an instrument a number of fine straight lines will be seen cutting across the field of view. These lines are arranged in one of several different ways and may be of any number up to a dozen or so. They are to enable the surveyor to make the intricate measurements necessary in the practice of his profession.

On Canadian topographical surveys these lines are ordinarily of spider web, and stretched across an annular ring within the telescope when this spider web becomes ascope itself. For emergency use when this spider web becomes accidentally broken some other device carried, such as a glass diaphragm on which the lines have been etched, is substituted. The spider web, however, is much more satisfactory. The lines must be very fine and black and no artificial product which has yet been tried has the requisite combination of fineness, strength and elasticity.

Owing to the superiority of the spider web, the surveyors may endeavour to replace the broken web with a new one. This is an extremely delicate operation and one that is very difficult to perform in camp, particularly as the lines require to be accurately spaced. Sometimes they are only about one sixteenth of an inch apart.

This operation that is so difficult to perform in camp, is quite readily performed in a properly equipped laboratory. Thus, in the Physical Testing Laboratory of the Topographical survey, Department of the Interior, where instruments used in topographical mapping are regularly inspected and tested and other work in connection there with is carried on, the spider lines are handled with ease and assurance. New spider lines are inserted at the correct tension and the proper spacing.

Afterwards the distances between them are accurately measured under the microscope, and with proper testing apparatus the instrument is again put in perfect adjustment ready for field use.

The web, as produced by the spider is ordinarily a number of strands spun together somewhat in the form of a rope. Single strands separated from the freshly spun web give the best results, though some prefer to take the web directly from the spider's cocoon. Grains of dust sometimes collect on the spider lines which distracts from their use when viewed in the telescope.

In the laboratory the webs are dusted off and the single strands separated. As idea of the delicacy of touch required may be formed when it is stated that spiders webs have a thickness before the strands are separated of only two or three ten thousandths of an inch. It has been calculated that a pound of web, as used on telescope diaphragms, would stretch around the earth - some 25,000 miles - and 500,000 tons (Cont'd at foot of next column)

EDGERTON NEWS

(Continued from page 1)

A resolution was passed that support be given to the Edmonton-Saskatoon road via Wainwright. The Secretary was instructed to write other Boards of Trade in towns on the route asking for their support.

On Sunday, Miss Elsie Ayres left Edgerton for Lamont where she is going in training for a nurse. A large crowd assembled at the station to wish her 'good luck.'

On Tuesday the Ogwanada Girls Club (of which Miss Ayres is a past president) held a social evening at the home of Mrs. Bransgrove and presented Miss Ayres with a nurse's wrist watch, as a token of good will which has always existed between them.

On Friday evening the residents of Edgerton met in Gortons Hall for a farewell dance in honor of Miss Ayres, during which they presented her with a French Ivory tray and manicure articles.

SHERLOCK LADIES AID

Sherlock Ladies Aid will hold a 500 Drive and Dance in Sherlock school Monday evening next April 5th. Admission 50c. Ladies please bring baskets. Ladies not bringing baskets will be charged admission. Good prizes. Good music.

W. L. A. NOTES

The monthly meeting of the Ladies Auxiliary of Westminster Church will be held at the home of Mrs. Foxwell, Thursday, April 8th at 3 o'clock.

LEALHOLME U.F.A.

A meeting of the Lealholme U.F.A. will be held in Prosperity school on Wednesday evening April 7th at 8 o'clock. A full attendance is requested as important business will be brought forward.

For satisfaction use the "Scripto Pencil". A scripto holds 5 1/2 in's. of lead at one filling. Altogether you get 33 inches of lead with a pencil costing you 50c. Scripto pencils are used entirely by large institutions like Remington Typewriter Co. U. C. & Sth Railway Co. Hartford Insurance Co. and many others. For Sale by McKechnie's Drug & Stationery

Silk hats are said to be gaining popularity in some towns in England.

Salesgirl (to companion) "That man who bought that five pound box of chocolates said it was for his wife."

"Is he just married?"
"Either that, or he's done something."

The sweet young thing gazed pensively out at the peaceful rural scene.

"Why are you running that steam roller thing over that field?" she asked at last.

"I'm raising mashed potatoes this year," replied the farmer

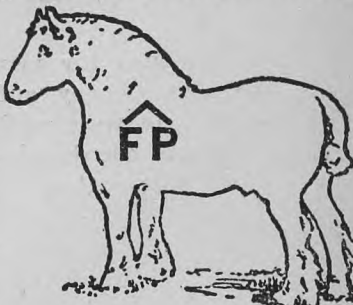

would reach to the nearest fixed star.

WANTED!

400 of Our Subscribers to Earn \$3.00 per Hour

ALL YOU HAVE TO DO IS TO DO IS TO FILL IN THE FOLLOWING BLANK WITH THE NAMES AND ADDRESSES OF THREE PEOPLE WHO YOU THINK ARE LIKELY SUBSCRIBERS TO "THE CHRONICLE" AND MAIL IT TO US AT ONCE.

To The Chauvin Chronicle, Chauvin, Alberta.

Dear Sirs:-

I submit the following names of prospective new subscribers to you.

Name	Address
First	
Second	
Third.....	

My Name is

Address

My reason for subscribing to the Chronicle is:

To these prospects we will send a direct by mail subscription campaign.

FOR EACH SUBSCRIPTION brought in by this campaign the person sending in the name of the subscriber will be credited with 50 CENTS on their Subscription, except in cases where two send in the name of the same prospective, in which case the one who rates the name highest on the list gets the commission. In case of absolute tie the commission will be divided.

Put the most likely subscriber first and so on.

THIS MAY MEAN MONEY FOR BOTH OF US!

DO NOT FAIL TO SEND IN YOUR BLANK AT ONCE

A LONG JOB

Whilst his wife was out the father decided that he would cut little Bobby's hair. Barbers are inclined to be expensive in these days and 15 cents saved is 15 cents gained.

Although he was making quite a satisfactory job of it although rather slow, and Bobby, as impatient as all children, found the operation wearying.

"Are you nearly done, daddie?" he inquired at length.

"Very nearly, sonny," replied his father. "I've only got the front to do now."

"H'm, I'm afraid the back will have grown again by the time you've done the front," sighed the small boy sadly, reaching for another book to read.

Hicks: "How does it happen that you are going fishing on Friday. I thought you believed Friday was an unlucky day."

Wicks: "Yes, I always have. But it occurred to me this morning that perhaps it would be unlucky for the fish as well."

It was late one evening, and he was tired of being accosted by the many street hawkers.

The last straw came when a flower seller stopped him with, "Snowdrops, sir?"

"I always knew it did!" he snapped and strode on.

The track supervisor received the following note from one of his foremen:

"I'm sending in the accident report on Casey's foot when he struck it with the spike maul. Now under 'Remarks,' do you want mine or do you want Casey's?"

Merchant (to applicant for situation): "Your handwriting is good but can you write short-hand?"

Applicant: "Oh, yes, but it takes me longer."

Father: "Here's another bill, Beatrice. Do you never think of preparing for a rainy day?"

Beatrice: "Of course, father. That's for a raincoat and an umbrella."

Eloping Bride: "Here's a telegram from father!"

Bridegroom: "There! I knew he'd come round. What does the old chap say?"

Old chap say?" "Do not come home and all will be forgiven."

WHAT'S IN A NAME

He had ordered some chicken soup in the lunchroom, and having tasted it said to the waitress:

"What is this you have brought me?"

"Deed, sah, dat's chicken soup was the reply.

"Well, there is no chicken is it?" "No sah; dere ain't no dog in dog biscuits, either."

AIRLIE SCHOOL DISTRICT NO 2980

A special meeting of ratepayers of Airlie School will be held in Airlie School the 2nd of April at 3.30. to discuss ways and means of putting a basement under the school.

ADVERTISE: IT PAYS

THE COVERED WAGON

(Continued from page two) bravely. "He called it free to you! But don't wait."

But the victor sprang free, stood, dashed the blood from his own eyes, wavered on his feet.

The hands of his fallen foe were across his eyes. But even as his men ran in, stooped and drew them away the conqueror exclaimed:

"I'll not! I tell you I won't maim you, free or no free! Get up!"

So Woodhull knew that his eyes were spared whatever might be the pain of the sore nerves along the socket bone.

He rose to his knees, to his feet his face ghastly in his own sudden sense of defeat, the worse for his victor's magnanimity, if such it might be called. Humiliation was worse than pain. He staggered, sobbing.

"I won't take nothing for a gift from you!"

But now the men stood between them, like and like. Young Jed Wingate pushed back his man.

"It's done!" said he. "You hant fight no more with the man hat let you up. You're whipped,

and by your own word it'd have been worse."

He himself handed Will Banion his coat.

"Go get a pail of water," he said to Kelsey, and the latter departed.

Banion stepped back, battered and pale beneath his own wounds

"I didn't want to fight him this way," said he. "I left him his eyes so that he can see me again. If so he wants, I'll meet him any way. I hope he won't rue back."

"You fool!" said old Bill Jackson, drawing Banion to one side "Do ye know what ye're sayin'? Whiles he was a'layin' thar I seen the bottoms o' his boots. Right fancy they was, with smallish heels! That skunk'll kill ye in the dark. Ye'd orto hev put out'n both his two eyes!"

A sudden sound made them all turn. Came crackling of down brush, the scream of a woman's voice. At the side of the great tree stood a figure that had no right there. They turned mute. There. They turned mute.

It was Molly Wingate who faced them all now, turning from one bloody, naked figure to the other. She saw Sam Woodhull standing,

his hands still at his face; caught some sense of Jackson's words overheard as she came into the clearing.

"You!" she blazed at Will Banion "You'd put out a man's eyes! You brute."

(To be Continued)

QUITE UNKNOWN

The conjuror was feeling very pleased with himself and his audience. Every trick that evening had produced thunderous applause.

"Now, ladies and gentlemen I propose to show you my latest trick," said he; "but to perform it I must ask a little girl from the audience to help me."

Almost immediately a little girl tripped up to the stage.

"So kind of you," said the conjuror. "Will you stand there?"

The little girl stood there.

"Now, my dear, you and I have never seen each other before, have we?" asked the conjuror in a loud voice.

"No, daddie," replied the child

Those who bring sunshine into the lives of others cannot keep it from themselves.

FEEDERS' "DOLLAR" DAY At the University of Alberta

\$\$\$ Saved are \$\$\$ Made—Thousands of dollars might be saved in the feeding of cattle, sheep and swine in Alberta if the most economical rations were used. Feeders may spend a profitable day at the University of Alberta on Saturday, April 10th, when the results of feeding trials conducted during the past year will be discussed. The dollars and cents interpretation of these results will point the way to increased profits in live stock feeding.

!!! Cattle and Swine Feeders—How many question marks are be-

fore you? Some of those which you may eliminate after Saturday, April 10th, are:

1. What is the value of silage for fattening steers and feeding dairy cattle?
2. What is the relative value of oat hay and alfalfa hay for finishing steers and for milk production?
3. What is linseed oil meal worth when fed to steers?
4. Is full grain feeding more profitable than limited grain feeding in steer feeding?
5. Is it safe to buy heifers for feeding and how do they compare with steers in rate and economy of grain?

6. Does it pay to feed minerals to steers and swine?

7. What are the most suitable substitutes for skim milk in swine feeding and which pasture crops give the best results?

The 80 steers, 20 dairy cows and 320 swine which have been co-operating with us during the past year in preparation for our 1926 Feeders Day will answer the above questions in their own way. Join the crowd that will gather at the University of Alberta a 10 o'clock on Saturday morning. April 10th, the last day of the Edmonton Spring Show, and take part in the Dollar Day discussion.

PROGRAMME OF

"FEEDERS' DAY"

At the University of Alberta, Saturday, April 10th, 1926

10.30—Inspection of eight lots of finished cattle that have been on feeding tests since last November and a discussion of the following questions:

1. A comparison of steers and heifers.
2. The value of a simple mineral mixture.
3. A comparison of full and limited grain feeding.
4. The value of linseed oil meal.
5. Oat silage versus oat hay.
6. Oat hay compared with alfalfa hay.

1.45—Results of Dairy Cattle experiments in 1926.

2.15—High lights in connection with profitable winter pork production.

3.15—Handling 5,000 in the feed lot: Mr. T. J. Irwin, Superintendent of the Edmonton Feeding Plant.

3.45—Export Markets for Western Canada finished cattle: Mr. H. P. Kennedy, of H. P. Kennedy, Ltd., and President of the Live Stock Producers.

4.15—Question Box dealing with general feeding problems.

Worse things happen to a man whose wife runs away. She may come back.

C.P.R. TO BUILD

SOUTH LINE

Announcement is made that the C.P.R. will commence construction shortly of the proposed branch line from Cardston, south west of Lethbridge to Glenwoodville, serving a large section of the united irrigation district, where a heavy crop of wheat and sugar beets is raised.

A PROSPEROUS

ALBERTA FARMER

John Dahl, a farmer at Cereal, Alberta, on the Hanna-Drumheller line of the Canadian National Railway, last year threshed 3,360 bushels of wheat from 110 acres of stubble land. He also had 180 acres of summerfallow and has threshed from 290 acres a total of 10,000 bushels of grain.
